SUBJECT INDEX

Absorption

Treatment of Wave Breaking and Total Absorption in a Mild-Slope Equation FEM Model, Gian Mario Beltrami, Giorgio Bellotti, Paolo De Girolamo and Paolo Sammarco, WW Sept./Oct. 01, p263-271.

Algorithms

Genetic Algorithm for Selecting and Scheduling Interdependent Projects, Jyh-Cherng Jong and Paul Schonfeld, WW Jan./Feb. 01, p45-52.

Amplitude

Theoretical Study of the Drift of Small Rigid Floating Objects in a Wave Field, Hayley H. Shen and Yu Zhong, WW Nov./Dec. 01, p343-351.

Approximation methods

Estimation of Incident and Reflected Waves Using Simulated Annealing, Josep R. Medina, WW July/Aug. 01, p213-221.

ASCE Publications

Announcement, WW July/Aug. 01, p191.

Announcement, WW Sept./Oct. 01, p253.

Editor's Note, Zeki Demirbilek, WW Jan./Feb. 01, p1.

Awards

Announcement, WW July/Aug. 01, p191.

Backfills

Sediment Transport and Backfilling of Trenches in Oscillatory Flow, Jacob Hjelmager Jensen and Jørgen Fredsøe, WW Sept./Oct. 01, p272-281.

Backwater

Simulating Barge Drawdown and Currents in Channel and Backwater Areas, Richard L. Stockstill and R. C. Berger, WW Sept./Oct. 01, p290-298.

Barges

Efficiency versus Fairness in Priority Control: Waterway Lock Case, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p82-88.

Simulating Barge Drawdown and Currents in Channel and Backwater Areas, Richard L. Stockstill and R. C. Berger, WW Sept./Oct. 01, p290-298.

Bathymetry

Linear Refraction-Diffraction Model for Steep Bathymetry, Carmela N. Chandrasekera and Kwok Fai Cheung, WW May/June 01, p161-170.

Beaches

Wave Mechanics for Ocean Engineering by Paolo Boccotti, Zeki Demirbilek, WW July/Aug. 01, p252.

Boundary conditions

Boussinesq-Type Model with Boundary-Fitted Coordinate System, Y.S. Li and J. M. Zhan, WW May/June 01, p152-160.

Boundary layer

Modeling Effect of Intersection Angle on Near-Bed Flows for Waves and Currents, Hyoseob Kim, Brian A. O'Connor, Inbo Park and Younggyu Lee, WW Nov./Dec. 01, p308-318.

Sand Transport in Oscillatory Sheet Flow with Mean Current, S. R. McLean, J. S. Ribberink, C. M. Dohmen-Janssen and W. N. Hassan, WW May/June 01, p141-151.

Boussinesq equations

Boussinesq-Type Model with Boundary-Fitted Coordinate System, Y.S. Li and J. M. Zhan, WW May/June 01, p152-160.

Breaking waves

Experiments with Groups of Breaking Waves. Part I: Short Wave Motion, I. A. Svendsen and J. Veeramony, WW July/Aug. 01, p200-212.

Treatment of Wave Breaking and Total Absorption in a Mild-Slope Equation FEM Model, Gian Mario Beltrami, Giorgio Bellotti, Paolo De Girolamo and Paolo Sammarco, WW Sept./Oct. 01, p263-271.

Wave Runup of Random Waves on a Small Circular Pier on Sloping Seabed, Hajime Mase, Kazuani Kosho and Shunji Nagahashi, WW July/Aug. 01, p192-199.

Breakwaters

Wave Damping Characteristics of Deeply Submerged Breakwaters, Sheng-Wen Twu, Cheng-Chi Liu and Wen-Hung Hsu, WW Mar./Apr. 01, p97-105.

Wave-Induced Mean Magnitudes in Permeable Submerged Breakwaters, Fernando J. Méndez, Iñigo J. Losada and Miguel A. Losada, WW Jan./Feb. 01, p7-15.

Bridges, piers

Retrofit Analysis of Bridge Fender Systems, Rafal Wutrich, Jerry Wekezer, Jack Toth and Nur Yazdani, WW Nov./Dec. 01, p327-333.

Cargo handling

Evaluation of Handling Systems for Container Terminals, Ki-Chan Nam and Won-Ik Ha, WW May/June 01, p171-175.

Case reports

Efficiency versus Fairness in Priority Control: Waterway Lock Case, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p82-88.

Investigation of Long-Term Transport in Tanshui River Estuary, Taiwan, Wen-Cheng Liu, Ming-Hsi Hsu and Albert Y. Kuo, WW Mar./Apr. 01, p61-71.

Channels, waterways

Factors Controlling Navigation-Channel Shoaling in Laguna Madre, Texas, Robert A. Morton, Robin C. Nava and Martin Arhelger, WW Mar./Apr. 01, p72-81.

Circulation

Investigation of Long-Term Transport in Tanshui River Estuary, Taiwan, Wen-Cheng Liu, Ming-Hsi Hsu and Albert Y. Kuo, WW Mar./Apr. 01, p61-71.

Coastal environment

Tidal Regime in Gulf of Kutch, West Coast of India, by 2D Model, A. S. Unnikrishnan, A. D. Gouveia and P. Vethamony, WW Nov./Dec. 99, p276-284.

Coastal morphology

Mesoscale Model for Morphologic Change at Tidal Inlets, P. A. Work, J. Guan, E. J. Hayter and S. Elci, WW Sept./Oct. 01, p282-289.

Coastal processes

Factors Controlling Navigation-Channel Shoaling in Laguna Madre, Texas, Robert A. Morton, Robin C. Nava and Martin Arhelger, WW Mar./Apr. 01, p72-81.

Coastal structures

N-Type Sediment Bed Response under Standing Wave, Tom O'Donoghue, WW July/Aug. 01, p245-248.

Columns

Runup on Columns in Steep, Deep Water Regular Waves, A. J. Martin, W. J. Easson and T. Bruce, WW Jan./Feb. 01, p26-32.

Computation

The Fall-Velocity Equation, John P. Ahrens, WW Mar./Apr. 00, p99-102.

Container shipping

Effect of Seasonal Factors on Performance of Container Terminals, A. A. Shabayek and W. W. Yeung, WW May/June 01, p135-140.

Evaluation of Handling Systems for Container Terminals, Ki-Chan Nam and Won-Ik Ha, WW May/June 01, p171-175.

Containment

Oil Containment by Boom in Waves and Wind. I: Numerical Model, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p222-227.

Oil Containment by Boom in Waves and Wind. II: Waves, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p228-233.

Oil Containment by Boom in Waves and Wind. III: Containment Failure, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p234-239.

Containment vessels

Factors Controlling Navigation-Channel Shoaling in Laguna Madre, Texas, Robert A. Morton, Robin C. Nava and Martin Arhelger, WW Mar./Apr. 01, p72-81.

Currents

Modeling Effect of Intersection Angle on Near-Bed Flows for Waves and Currents, Hyoseob Kim, Brian A. O'Connor, Inbo Park and Younggyu Lee, WW Nov./Dec. 01, p308-318.

Simulating Barge Drawdown and Currents in Channel and Backwater Areas, Richard L. Stockstill and R. C. Berger, WW Sept./Oct. 01, p290-298.

Tidal Regime in Gulf of Kutch, West Coast of India, by 2D Model, A. S. Unnikrishnan, A. D. Gouveia and P. Vethamony, WW Nov./Dec. 99, p276-284.

Cylinders

Boussinesq-Type Model with Boundary-Fitted Coordinate System, Y.S. Li and J. M. Zhan, WW May/June 01, p152-160.

Deep water

Runup on Columns in Steep, Deep Water Regular Waves, A. J. Martin, W. J. Easson and T. Bruce, WW Jan./Feb. 01, p26-32.

Theoretical Study of the Drift of Small Rigid Floating Objects in a Wave Field, Hayley H. Shen and Yu Zhong, WW Nov./Dec. 01, p343-351.

Deformation

Experiments and Numerics of Bichromatic Wave Groups, J. Westhuis, E. van Groesen and R. Huijsmans, WW Nov./Dec. 01, p334-342.

Diffraction

Linear Refraction-Diffraction Model for Steep Bathymetry, Carmela N. Chandrasekera and Kwok Fai Cheung, WW May/June 01, p161-170.

Dikes

Wave Runup on Dikes with Shallow Foreshores, Marcel R. A. van Gent, WW Sept./Oct. 01, p254-262.

Disasters

Announcement, WW July/Aug. 01, p191.

Dissipation

Treatment of Wave Breaking and Total Absorption in a Mild-Slope Equation FEM Model, Gian Mario Beltrami, Giorgio Bellotti, Paolo De Girolamo and Paolo Sammarco, WW Sept./Oct. 01, p263-271.

Drawdown

Simulating Barge Drawdown and Currents in Channel and Backwater Areas, Richard L. Stockstill and R. C. Berger, WW Sept./Oct. 01, p290-298.

Dredging

Factors Controlling Navigation-Channel Shoaling in Laguna Madre, Texas, Robert A. Morton, Robin C. Nava and Martin Arhelger, WW Mar./Apr. 01, p72-81.

Optimization of Mechanical Dredging Operations for Sediment Remediation, Carola A. Blazquez, Teresa M. Adams and Philip Keillor, WW Nov./Dec. 01, p299-307.

Drift

Theoretical Study of the Drift of Small Rigid Floating Objects in a Wave Field, Hayley H. Shen and Yu Zhong, WW Nov./Dec. 01, p343-351.

Energy dissipation

Wave-Induced Mean Magnitudes in Permeable Submerged Breakwaters, Fernando J. Méndez, Iñigo J. Losada and Miguel A. Losada, WW Jan./Feb. 01, p7-15.

Environmental issues

Optimization of Mechanical Dredging Operations for Sediment Remediation, Carola A. Blazquez, Teresa M. Adams and Philip Keillor, WW Nov./Dec. 01, p299-307.

Equations of motion

Improvement of Parabolic Nonlinear Dispersive Wave Model, James M. Kaihatu, WW Mar./Apr. 01, p113-121.

Erosion

Wave Chronology Effects on Long-Term Shoreline Erosion Predictions, Ping Dong and Huixin Chen, WW May/June 01, p186-189.

Estimation

Estimation of Incident and Reflected Waves Using Simulated Annealing, Josep R. Medina, WW July/Aug. 01, p213-221.

Estuaries

Investigation of Long-Term Transport in Tanshui River Estuary, Taiwan, Wen-Cheng Liu, Ming-Hsi Hsu and Albert Y. Kuo, WW Mar./Apr. 01, p61-71.

Evaluation

Evaluation of Handling Systems for Container Terminals, Ki-Chan Nam and Won-Ik Ha, WW May/June 01, p171-175.

Evolution, development
Wave Mechanics for Ocean Engineering by Paolo Boccotti, Zeki Demirbilek, WW July/Aug. 01, p252.

Experimentation
Experiments and Numerics of Bichromatic Wave Groups, J. Westhuis, E. van Groesen and R. Huijsmans, WW Nov./Dec. 01, p334-342.

Failures
Oil Containment by Boom in Waves and Wind. III: Containment Failure, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p234-239.

Fenders
Retrofit Analysis of Bridge Fender Systems, Rafal Wutrich, Jerry Wekezer, Jack Toth and Nur Yazdani, WW Nov./Dec. 01, p327-333.

Finite differences
Boussinesq-Type Model with Boundary-Fitted Coordinate System, Y.S. Li and J. M. Zhan, WW May/June 01, p152-160.

Floating bodies
Theoretical Study of the Drift of Small Rigid Floating Objects in a Wave Field, Hayley H. Shen and Yu Zhong, WW Nov./Dec. 01, p343-351.

Florida
Numerical Modeling of Waves at Ponce de Leon Inlet, Florida, S. Jarrell Smith, P.E. and Jane McKee Smith, P.E., WW May/June 01, p176-184.

Forecasting
Back-Propagation Neural Network in Tidal-Level Forecasting, Ching-Piao Tsai and Tsong-Lin Lee, WW July/Aug. 99, p195-202.

Foreshore
Wave Runup on Dikes with Shallow Foreshores, Marcel R. A. van Gent, WW Sept./Oct. 01, p254-262.

Freight terminals
Effect of Seasonal Factors on Performance of Container Terminals, A. A. Shabayek and W. W. Yeung, WW May/June 01, p135-140.

Evaluation of Handling Systems for Container Terminals, Ki-Chan Nam and Won-Ik Ha, WW May/June 01, p171-175.

Friction coefficient, hydraulic
Wave Damping Characteristics of Deeply Submerged Breakwaters, Sheng-Wen Twu, Cheng-Chi Liu and Wen-Hung Hsu, WW Mar./Apr. 01, p97-105.

Grain size
The Fall-Velocity Equation, John P. Ahrens, WW Mar./Apr. 00, p99-102.

Ground-water quality
River Basin Network Model for Integrated Water Quantity/Quality Management, Tewei Dai and John W. Labadie, WW Sept./Oct. 01, p295-305.

Gulfs
Tidal Regime in Gulf of Kutch, West Coast of India, by 2D Model, A. S. Unnikrishnan, A. D. Gouveia and P. Vethamony, WW Nov./Dec. 99, p276-284.

Hong Kong
Effect of Seasonal Factors on Performance of Container Terminals, A. A. Shabayek and W. W. Yeung, WW May/June 01, p135-140.

Hydrodynamics
Investigation of Long-Term Transport in Tanshui River Estuary, Taiwan, Wen-Cheng Liu, Ming-Hsi Hsu and Albert Y. Kuo, WW Mar./Apr. 01, p61-71.

Oil Containment by Boom in Waves and Wind. I: Numerical Model, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p222-227.

Oil Containment by Boom in Waves and Wind. II: Waves, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p228-233.

Hydrologic models
Mesoscale Model for Morphologic Change at Tidal Inlets, P. A. Work, J. Guan, E. J. Hayter and S. Elci, WW Sept./Oct. 01, p282-289.

India
Numerical Modeling of Tide-Induced Currents in Thane Creek, West Coast of India, V. S. Naidu and R. V. Sarma, WW July/Aug. 01, p241-244.

Tidal Regime in Gulf of Kutch, West Coast of India, by 2D Model, A. S. Unnikrishnan, A. D. Gouveia and P. Vethamony, WW Nov./Dec. 99, p276-284.

Inlets, waterways
Mesoscale Model for Morphologic Change at Tidal Inlets, P. A. Work, J. Guan, E. J. Hayter and S. Elci, WW Sept./Oct. 01, p282-289.

Numerical Modeling of Waves at Ponce de Leon Inlet, Florida, S. Jarrell Smith, P.E. and Jane McKee Smith, P.E., WW May/June 01, p176-184.

Interactions
Numerical Modeling of Wave Interaction with Porous Structures, Philip L.-F. Liu, Pengzhi Lin, Kuang-An Chang and Tsutomu Sakakiyama, WW Nov./Dec. 99, p322-330.

Investments
Genetic Algorithm for Selecting and Scheduling Interdependent Projects, Jyh-Cherng Jong and Paul Schonfeld, WW Jan./Feb. 01, p45-52.

Korea
Evaluation of Handling Systems for Container Terminals, Ki-Chan Nam and Won-Ik Ha, WW May/June 01, p171-175.

Locks
Control Alternatives at a Waterway Lock, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p89-96.

Efficiency versus Fairness in Priority Control: Waterway Lock Case, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p82-88.

Marine transportation
Effect of Seasonal Factors on Performance of Container Terminals, A. A. Shabayek and W. W. Yeung, WW May/June 01, p135-140.

Models
Effect of Seasonal Factors on Performance of Container Terminals, A. A. Shabayek and W. W. Yeung, WW May/June 01, p135-140.

Improvement of Parabolic Nonlinear Dispersive Wave Model, James M. Kaihatu, WW Mar./Apr. 01, p113-121.

Linear Refraction-Diffraction Model for Steep Bathymetry, Carmela N. Chandrasekera and Kwok Fai Cheung, WW May/June 01, p161-170.

Navier-Stokes equations
Three-Dimensional Model of Navier-Stokes Equations for Water Waves, Bin Li and Chris A. Fleming, WW Jan./Feb. 01, p16-25.

Nearshore circulation
Wave Energy and Direction Observed Near Pier, Steve Elgar, R. T. Guza, W. C. O'Reilly, B. Raubenheimer and T. H. C. Herbers, WW Jan./Feb. 01, p2-6.

Networks
River Basin Network Model for Integrated Water Quantity/Quality Management, Tewei Dai and John W. Labadie, WW Sept./Oct. 01, p295-305.

Neural networks
Back-Propagation Neural Network in Tidal-Level Forecasting, Ching-Piao Tsai and Tsong-Lin Lee, WW July/Aug. 99, p195-202.

Nonlinear response
Second-Order Superharmonic Wave Loading on Jack-Up Platforms, C. Y. Liaw, T. Naik and C. G. Koh, WW Nov./Dec. 01, p319-326.

Numerical models
Boussinesq-Type Model with Boundary-Fitted Coordinate System, Y.S. Li and J. M. Zhan, WW May/June 01, p152-160.

Modeling Effect of Intersection Angle on Near-Bed Flows for Waves and Currents, Hyoseob Kim, Brian A. O'Connor, Inbo Park and Younggyu Lee, WW Nov./Dec. 01, p308-318.

Numerical Modeling of Tide-Induced Currents in Thane Creek, West Coast of India, V. S. Naidu and R. V. Sarma, WW July/Aug. 01, p241-244.

Numerical Modeling of Wave Interaction with Porous Structures, Philip L.-F. Liu, Pengzhi Lin, Kuang-An Chang and Tsutomu Sakakiyama, WW Nov./Dec. 99, p322-330.

Numerical Modeling of Waves at Ponce de Leon Inlet, Florida, S. Jarrell Smith, P.E. and Jane McKee Smith, P.E., WW May/June 01, p176-184.

Oil Containment by Boom in Waves and Wind. I: Numerical Model, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p222-227.

Prediction of Lee-Wake Scouring of Pipelines in Currents, Fangjun Li and Liang Cheng, WW Mar./Apr. 01, p106-112.

Three-Dimensional Model of Navier-Stokes Equations for Water Waves, Bin Li and Chris A. Fleming, WW Jan./Feb. 01, p16-25.

Tidal Regime in Gulf of Kutch, West Coast of India, by 2D Model, A. S. Unnikrishnan, A. D. Gouveia and P. Vethamony, WW Nov./Dec. 99, p276-284.

Wave Chronology Effects on Long-Term Shoreline Erosion Predictions, Ping Dong and Huixin Chen, WW May/June 01, p186-189.

Ocean engineering
Announcement, WW Sept./Oct. 01, p253.

Wave Mechanics for Ocean Engineering by Paolo Boccotti, Zeki Demirbilek, WW July/Aug. 01, p252.

Ocean waves
Numerical Modeling of Waves at Ponce de Leon Inlet, Florida, S. Jarrell Smith, P.E. and Jane McKee Smith, P.E., WW May/June 01, p176-184.

Oil Containment by Boom in Waves and Wind. I: Numerical Model, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p222-227.

Oil Containment by Boom in Waves and Wind. II: Waves, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p228-233.

Oil Containment by Boom in Waves and Wind. III: Containment Failure, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p234-239.

Offshore pipeline
Prediction of Lee-Wake Scouring of Pipelines in Currents, Fangjun Li and Liang Cheng, WW Mar./Apr. 01, p106-112.

Offshore structures
Runup on Columns in Steep, Deep Water Regular Waves, A. J. Martin, W. J. Easson and T. Bruce, WW Jan./Feb. 01, p26-32.

Oils
Oil Containment by Boom in Waves and Wind. I: Numerical Model, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p222-227.

Oil Containment by Boom in Waves and Wind. II: Waves, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p228-233.

Oil Containment by Boom in Waves and Wind. III: Containment Failure, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p234-239.

Optimization
Optimization of Mechanical Dredging Operations for Sediment Remediation, Carola A. Blazquez, Teresa M. Adams and Philip Keillor, WW Nov./Dec. 01, p299-307.

Oscillatory flow
Sand Transport in Oscillatory Sheet Flow with Mean Current, S. R. McLean, J. S. Ribberink, C. M. Dohmen-Janssen and W. N. Hassan, WW May/June 01, p141-151.

Sediment Transport and Backfilling of Trenches in Oscillatory Flow, Jacob Hjelmager Jensen and Jørgen Fredsøe, WW Sept./Oct. 01, p272-281.

Overtopping
Numerical Modeling of Wave Interaction with Porous Structures, Philip L.-F. Liu, Pengzhi Lin, Kuang-An Chang and Tsutomu Sakakiyama, WW Nov./Dec. 99, p322-330.

Piers
Wave Energy and Direction Observed Near Pier, Steve Elgar, R. T. Guza, W. C. O'Reilly, B. Raubenheimer and T. H. C. Herbers, WW Jan./Feb. 01, p2-6.

Wave Runup of Random Waves on a Small Circular Pier on Sloping Seabed, Hajime Mase, Kazuani Kosho and Shunji Nagahashi, WW July/Aug. 01, p192-199.

Planform
Wave Mechanics for Ocean Engineering by Paolo Boccotti, Zeki Demirbilek, WW July/Aug. 01, p252.

Porous media
Numerical Modeling of Wave Interaction with Porous Structures, Philip L.-F. Liu, Pengzhi Lin, Kuang-An Chang and Tsutomu Sakakiyama, WW Nov./Dec. 99, p322-330.

Porous media flow
Wave-Induced Mean Magnitudes in Permeable Submerged Breakwaters, Fernando J. Méndez, Iñigo J. Losada and Miguel A. Losada, WW Jan./Feb. 01, p7-15.

Predictions
Wave Chronology Effects on Long-Term Shoreline Erosion Predictions, Ping Dong and Huixin Chen, WW May/June 01, p186-189.

Progressive waves
Wave Scour around a Large Vertical Circular Cylinder, B. M. Sumer and J. Fredsøe, WW May/June 01, p125-134.

Project planning
Genetic Algorithm for Selecting and Scheduling Interdependent Projects, Jyh-Cherng Jong and Paul Schonfeld, WW Jan./Feb. 01, p45-52.

Random waves
Wave Runup of Random Waves on a Small Circular Pier on Sloping Seabed, Hajime Mase, Kazuani Kosho and Shunji Nagahashi, WW July/Aug. 01, p192-199.

Refraction
Linear Refraction-Diffraction Model for Steep Bathymetry, Carmela N. Chandrasekera and Kwok Fai Cheung, WW May/June 01, p161-170.

Remedial action
Optimization of Mechanical Dredging Operations for Sediment Remediation, Carola A. Blazquez, Teresa M. Adams and Philip Keillor, WW Nov./Dec. 01, p299-307.

Retrofitting
Retrofit Analysis of Bridge Fender Systems, Rafal Wutrich, Jerry Wekezer, Jack Toth and Nur Yazdani, WW Nov./Dec. 01, p327-333.

River basins
River Basin Network Model for Integrated Water Quantity/Quality Management, Tewei Dai and John W. Labadie, WW Sept./Oct. 01, p295-305.

Salinity
River Basin Network Model for Integrated Water Quantity/Quality Management, Tewei Dai and John W. Labadie, WW Sept./Oct. 01, p295-305.

Sand
The Fall-Velocity Equation, John P. Ahrens, WW Mar./Apr. 00, p99-102.

Sand transport
Sand Transport in Oscillatory Sheet Flow with Mean Current, S. R. McLean, J. S. Ribberink, C. M. Dohmen-Janssen and W. N. Hassan, WW May/June 01, p141-151.

Scheduling
Control Alternatives at a Waterway Lock, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p89-96.

Efficiency versus Fairness in Priority Control: Waterway Lock Case, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p82-88.

Genetic Algorithm for Selecting and Scheduling Interdependent Projects, Jyh-Cherng Jong and Paul Schonfeld, WW Jan./Feb. 01, p45-52.

Scholarships
Announcement, WW July/Aug. 01, p191.

Scour
N-Type Sediment Bed Response under Standing Wave, Tom O'Donoghue, WW July/Aug. 01, p245-248.

Prediction of Lee-Wake Scouring of Pipelines in Currents, Fangjun Li and Liang Cheng, WW Mar./Apr. 01, p106-112.

Wave Scour around a Large Vertical Circular Cylinder, B. M. Sumer and J. Fredsøe, WW May/June 01, p125-134.

Sea floor
N-Type Sediment Bed Response under Standing Wave, Tom O'Donoghue, WW July/Aug. 01, p245-248.

Wave Runup of Random Waves on a Small Circular Pier on Sloping Seabed, Hajime Mase, Kazuani Kosho and Shunji Nagahashi, WW July/Aug. 01, p192-199.

Sediment
Factors Controlling Navigation-Channel Shoaling in Laguna Madre, Texas, Robert A. Morton, Robin C. Nava and Martin Arhelger, WW Mar./Apr. 01, p72-81.

The Fall-Velocity Equation, John P. Ahrens, WW Mar./Apr. 00, p99-102.

N-Type Sediment Bed Response under Standing Wave, Tom O'Donoghue, WW July/Aug. 01, p245-248.

Optimization of Mechanical Dredging Operations for Sediment Remediation, Carola A. Blazquez, Teresa M. Adams and Philip Keillor, WW Nov./Dec. 01, p299-307.

Sediment concentration
Sand Transport in Oscillatory Sheet Flow with Mean Current, S. R. McLean, J. S. Ribberink, C. M. Dohmen-Janssen and W. N. Hassan, WW May/June 01, p141-151.

Sediment transport
Sediment Transport and Backfilling of Trenches in Oscillatory Flow, Jacob Hjelmager Jensen and Jørgen Fredsøe, WW Sept./Oct. 01, p272-281.

Sedimentation
The Fall-Velocity Equation, John P. Ahrens, WW Mar./Apr. 00, p99-102.

Settling velocity
The Fall-Velocity Equation, John P. Ahrens, WW Mar./Apr. 00, p99-102.

Shallow water
Solitary Wave Runup on Plane Slopes, Ying Li and Fredric Raichlen, WW Jan./Feb. 01, p33-44.

Shear stress
Prediction of Lee-Wake Scouring of Pipelines in Currents, Fangjun Li and Liang Cheng, WW Mar./Apr. 01, p106-112.

Ship motion
Simulating Barge Drawdown and Currents in Channel and Backwater Areas, Richard L. Stockstill and R. C. Berger, WW Sept./Oct. 01, p290-298.

Shoaling
Factors Controlling Navigation-Channel Shoaling in Laguna Madre, Texas, Robert A. Morton, Robin C. Nava and Martin Arhelger, WW Mar./Apr. 01, p72-81.

Shoreline changes
Wave Chronology Effects on Long-Term Shoreline Erosion Predictions, Ping Dong and Huixin Chen, WW May/June 01, p186-189.

Simulation
Estimation of Incident and Reflected Waves Using Simulated Annealing, Josep R. Medina, WW July/Aug. 01, p213-221.

Slopes
Solitary Wave Runup on Plane Slopes, Ying Li and Fredric Raichlen, WW Jan./Feb. 01, p33-44.

Treatment of Wave Breaking and Total Absorption in a Mild-Slope Equation FEM Model, Gian Mario Beltrami, Giorgio Bellotti, Paolo De Girolamo and Paolo Sammarco, WW Sept./Oct. 01, p263-271.

Wave Runup of Random Waves on a Small Circular Pier on Sloping Seabed, Hajime Mase, Kazuani Kosho and Shunji Nagahashi, WW July/Aug. 01, p192-199.

Solitary wave
Solitary Wave Runup on Plane Slopes, Ying Li and Fredric Raichlen, WW Jan./Feb. 01, p33-44.

Spectral reflectance
Wave Energy and Direction Observed Near Pier, Steve Elgar, R. T. Guza, W. C. O'Reilly, B. Raubenheimer and T. H. C. Herbers, WW Jan./Feb. 01, p2-6.

Speed control
Control Alternatives at a Waterway Lock, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p89-96.

Standing waves
N-Type Sediment Bed Response under Standing Wave, Tom O'Donoghue, WW July/Aug. 01, p245-248.

Steady flow
Wave Scour around a Large Vertical Circular Cylinder, B. M. Sumer and J. Fredsøe, WW May/June 01, p125-134.

Storms
Numerical Modeling of Waves at Ponce de Leon Inlet, Florida, S. Jarrell Smith, P.E. and Jane McKee Smith, P.E., WW May/June 01, p176-184.

Streamflow
Wave Scour around a Large Vertical Circular Cylinder, B. M. Sumer and J. Fredsøe, WW May/June 01, p125-134.

Structural response
Numerical Modeling of Wave Interaction with Porous Structures, Philip L.-F. Liu, Pengzhi Lin, Kuang-An Chang and Tsutomu Sakakiyama, WW Nov./Dec. 99, p322-330.

Surf zone
Experiments with Groups of Breaking Waves. Part I: Short Wave Motion, I. A. Svendsen and J. Veeramony, WW July/Aug. 01, p200-212.

Tests
Treatment of Wave Breaking and Total Absorption in a Mild-Slope Equation FEM Model, Gian Mario Beltrami, Giorgio Bellotti, Paolo De Girolamo and Paolo Sammarco, WW Sept./Oct. 01, p263-271.

Texas
Factors Controlling Navigation-Channel Shoaling in Laguna Madre, Texas, Robert A. Morton, Robin C. Nava and Martin Arhelger, WW Mar./Apr. 01, p72-81.

Thickness
Wave Damping Characteristics of Deeply Submerged Breakwaters, Sheng-Wen Twu, Cheng-Chi Liu and Wen-Hung Hsu, WW Mar./Apr. 01, p97-105.

Three-dimensional models
Three-Dimensional Model of Navier-Stokes Equations for Water Waves, Bin Li and Chris A. Fleming, WW Jan./Feb. 01, p16-25.

Tidal currents
Investigation of Long-Term Transport in Tanshui River Estuary, Taiwan, Wen-Cheng Liu, Ming-Hsi Hsu and Albert Y. Kuo, WW Mar./Apr. 01, p61-71.

Numerical Modeling of Tide-Induced Currents in Thane Creek, West Coast of India, V. S. Naidu and R. V. Sarma, WW July/Aug. 01, p241-244.

Tidal waters
Back-Propagation Neural Network in Tidal-Level Forecasting, Ching-Piao Tsai and Tsong-Lin Lee, WW July/Aug. 99, p195-202.

Tides
Back-Propagation Neural Network in Tidal-Level Forecasting, Ching-Piao Tsai and Tsong-Lin Lee, WW July/Aug. 99, p195-202.

Mesoscale Model for Morphologic Change at Tidal Inlets, P. A. Work, J. Guan, E. J. Hayter and S. Elci, WW Sept./Oct. 01, p282-289.

Numerical Modeling of Tide-Induced Currents in Thane Creek, West Coast of India, V. S. Naidu and R. V. Sarma, WW July/Aug. 01, p241-244.

Tidal Regime in Gulf of Kutch, West Coast of India, by 2D Model, A. S. Unnikrishnan, A. D. Gouveia and P. Vethamony, WW Nov./Dec. 99, p276-284.

Time series analysis
Back-Propagation Neural Network in Tidal-Level Forecasting, Ching-Piao Tsai and Tsong-Lin Lee, WW July/Aug. 99, p195-202.

Topography
Boussinesq-Type Model with Boundary-Fitted Coordinate System, Y.S. Li and J. M. Zhan, WW May/June 01, p152-160.

Towing
Control Alternatives at a Waterway Lock, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p89-96.

Efficiency versus Fairness in Priority Control: Waterway Lock Case, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p82-88.

Transport phenomena
Investigation of Long-Term Transport in Tanshui River Estuary, Taiwan, Wen-Cheng Liu, Ming-Hsi Hsu and Albert Y. Kuo, WW Mar./Apr. 01, p61-71.

Trenches
Sediment Transport and Backfilling of Trenches in Oscillatory Flow, Jacob Hjelmager Jensen and Jørgen Fredsøe, WW Sept./Oct. 01, p272-281.

Turbulent flow
Modeling Effect of Intersection Angle on Near-Bed Flows for Waves and Currents, Hyoseob Kim, Brian A. O'Connor, Inbo Park and Younggyu Lee, WW Nov./Dec. 01, p308-318.

Underwater structures
Wave-Induced Mean Magnitudes in Permeable Submerged Breakwaters, Fernando J. Méndez, Iñigo J. Losada and Miguel A. Losada, WW Jan./Feb. 01, p7-15.

United Kingdom
Wave Chronology Effects on Long-Term Shoreline Erosion Predictions, Ping Dong and Huixin Chen, WW May/June 01, p186-189.

Velocity
Sand Transport in Oscillatory Sheet Flow with Mean Current, S. R. McLean, J. S. Ribberink, C. M. Dohmen-Janssen and W. N. Hassan, WW May/June 01, p141-151.

Vertical cylinders
Wave Scour around a Large Vertical Circular Cylinder, B. M. Sumer and J. Fredsøe, WW May/June 01, p125-134.

Water level fluctuations
Wave-Induced Mean Magnitudes in Permeable Submerged Breakwaters, Fernando J. Méndez, Iñigo J. Losada and Miguel A. Losada, WW Jan./Feb. 01, p7-15.

Water levels
Back-Propagation Neural Network in Tidal-Level Forecasting, Ching-Piao Tsai and Tsong-Lin Lee, WW July/Aug. 99, p195-202.

Water management
River Basin Network Model for Integrated Water Quantity/Quality Management, Tewei Dai and John W. Labadie, WW Sept./Oct. 01, p295-305.

Water waves
Runup on Columns in Steep, Deep Water Regular Waves, A. J. Martin, W. J. Easson and T. Bruce, WW Jan./Feb. 01, p26-32.

Three-Dimensional Model of Navier-Stokes Equations for Water Waves, Bin Li and Chris A. Fleming, WW Jan./Feb. 01, p16-25.

Wave Chronology Effects on Long-Term Shoreline Erosion Predictions, Ping Dong and Huixin Chen, WW May/June 01, p186-189.

Waterways
Announcement, WW Sept./Oct. 01, p253.

Control Alternatives at a Waterway Lock, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p89-96.

Efficiency versus Fairness in Priority Control: Waterway Lock Case, Ching-Jung Ting and Paul Schonfeld, WW Mar./Apr. 01, p82-88.

Genetic Algorithm for Selecting and Scheduling Interdependent Projects, Jyh-Cherng Jong and Paul Schonfeld, WW Jan./Feb. 01, p45-52.

Wave Mechanics for Ocean Engineering by Paolo Boccotti, Zeki Demirbilek, WW July/Aug. 01, p252.

Wave action
Numerical Modeling of Wave Interaction with Porous Structures, Philip L.-F. Liu, Pengzhi Lin, Kuang-An Chang and Tsutomu Sakakiyama, WW Nov./Dec. 99, p322-330.

Wave damping
Wave Damping Characteristics of Deeply Submerged Breakwaters, Sheng-Wen Twu, Cheng-Chi Liu and Wen-Hung Hsu, WW Mar./Apr. 01, p97-105.

Wave dispersion
Improvement of Parabolic Nonlinear Dispersive Wave Model, James M. Kaihatu, WW Mar./Apr. 01, p113-121.

Wave energy
Wave Damping Characteristics of Deeply Submerged Breakwaters, Sheng-Wen Twu, Cheng-Chi Liu and Wen-Hung Hsu, WW Mar./Apr. 01, p97-105.

Wave Energy and Direction Observed Near Pier, Steve Elgar, R. T. Guza, W. C. O'Reilly, B. Raubenheimer and T. H. C. Herbers, WW Jan./Feb. 01, p2-6.

Wave equations
Experiments and Numerics of Bichromatic Wave Groups, J. Westhuis, E. van Groesen and R. Huijsmans, WW Nov./Dec. 01, p334-342.

Wave forces
Second-Order Superharmonic Wave Loading on Jack-Up Platforms, C. Y. Liaw, T. Naik and C. G. Koh, WW Nov./Dec. 01, p319-326.

Wave groups
Experiments and Numerics of Bichromatic Wave Groups, J. Westhuis, E. van Groesen and R. Huijsmans, WW Nov./Dec. 01, p334-342.

Experiments with Groups of Breaking Waves. Part I: Short Wave Motion, I. A. Svendsen and J. Veeramony, WW July/Aug. 01, p200-212.

Wave height
Experiments with Groups of Breaking Waves. Part I: Short Wave Motion, I. A. Svendsen and J. Veeramony, WW July/Aug. 01, p200-212.

Solitary Wave Runup on Plane Slopes, Ying Li and Fredric Raichlen, WW Jan./Feb. 01, p33-44.

Wave measurement
Numerical Modeling of Waves at Ponce de Leon Inlet, Florida, S. Jarrell Smith, P.E. and Jane McKee Smith, P.E., WW May/June 01, p176-184.

Wave propagation
Boussinesq-Type Model with Boundary-Fitted Coordinate System, Y.S. Li and J. M. Zhan, WW May/June 01, p152-160.

Improvement of Parabolic Nonlinear Dispersive Wave Model, James M. Kaihatu, WW Mar./Apr. 01, p113-121.

Three-Dimensional Model of Navier-Stokes Equations for Water Waves, Bin Li and Chris A. Fleming, WW Jan./Feb. 01, p16-25.

Wave Energy and Direction Observed Near Pier, Steve Elgar, R. T. Guza, W. C. O'Reilly, B. Raubenheimer and T. H. C. Herbers, WW Jan./Feb. 01, p2-6.

Wave reflection
Estimation of Incident and Reflected Waves Using Simulated Annealing, Josep R. Medina, WW July/Aug. 01, p213-221.

N-Type Sediment Bed Response under Standing Wave, Tom O'Donoghue, WW July/Aug. 01, p245-248.

Wave-Induced Mean Magnitudes in Permeable Submerged Breakwaters, Fernando J. Méndez, Iñigo J. Losada and Miguel A. Losada, WW Jan./Feb. 01, p7-15.

Wave refraction
Wave Energy and Direction Observed Near Pier, Steve Elgar, R. T. Guza, W. C. O'Reilly, B. Raubenheimer and T. H. C. Herbers, WW Jan./Feb. 01, p2-6.

Wave runup
Runup on Columns in Steep, Deep Water Regular Waves, A. J. Martin, W. J. Easson and T. Bruce, WW Jan./Feb. 01, p26-32.

Solitary Wave Runup on Plane Slopes, Ying Li and Fredric Raichlen, WW Jan./Feb. 01, p33-44.

Wave Runup of Random Waves on a Small Circular Pier on Sloping Seabed, Hajime Mase, Kazuani Kosho and Shunji Nagahashi, WW July/Aug. 01, p192-199.

Wave Runup on Dikes with Shallow Foreshores, Marcel R. A. van Gent, WW Sept./Oct. 01, p254-262.

Wave spectra
Improvement of Parabolic Nonlinear Dispersive Wave Model, James M. Kaihatu, WW Mar./Apr. 01, p113-121.

Second-Order Superharmonic Wave Loading on Jack-Up Platforms, C. Y. Liaw, T. Naik and C. G. Koh, WW Nov./Dec. 01, p319-326.

Waves
Estimation of Incident and Reflected Waves Using Simulated Annealing, Josep R. Medina, WW July/Aug. 01, p213-221.

Modeling Effect of Intersection Angle on Near-Bed Flows for Waves and Currents, Hyoseob Kim, Brian A. O'Connor, Inbo Park and Younggyu Lee, WW Nov./Dec. 01, p308-318.

Theoretical Study of the Drift of Small Rigid Floating Objects in a Wave Field, Hayley H. Shen and Yu Zhong, WW Nov./Dec. 01, p343-351.

Wind
Oil Containment by Boom in Waves and Wind. I: Numerical Model, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p222-227.

Oil Containment by Boom in Waves and Wind. II: Waves, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p228-233.

Oil Containment by Boom in Waves and Wind. III: Containment Failure, Fangxin Fang and Archie J. Johnston, WW July/Aug. 01, p234-239.
